DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: It is not known what is meant by the phrase "has a surface of RMS 15" (Pg. 9 line 6). The RMS is not properly defined and can be a property in reference to a color, size, and/or in combination of the two or any other combination. The examiner kindly requests further definition and explanation of the term cited above.

Appropriate correction is required.

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Figure 10 item 14. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

Claims 1-14 are allowed over the prior art of record.

The following is a statement of reasons for the indication of allowable subject matter: As to independent Claims 1 and 8, the prior art of record, taken alone or in combination, fails to disclose or render obvious: a reflective surface surrounding each of said plurality of fasteners to permit inspection light to reflect from said reflective surface and permit viewing of an entire out circumference of a head of said each of said plurality of fasteners to detect head cracks and bursts, lower surface of said each of said plurality of fasteners being raised above said reflective surface, in combination with the rest of the limitations of the claims.

The dependent Claims 2-7 being further limiting to independent Claim 1; and dependent Claims 9-14 being further limiting to independent Claim 8; definite and enabled by the Specification are also allowed.

Conclusion

This application is in condition for allowance except for the following formal matters:

Objections to the Specification and the Drawings, as set forth above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

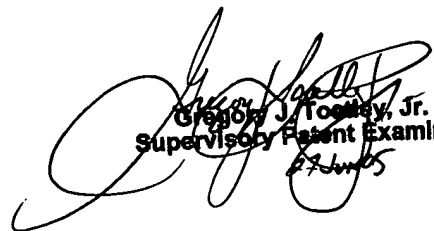

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
